

## **Italtergi: Innovation and Technology for the Motorhome industry**

**Italtergi**, leader in manufacturing wiping systems for off-road applications and electric motors, continues to stand out in the leisure and camper sector with innovative solutions that enhance comfort and safety during travel.

The company's commitment to the camper and motorhome industry began in 1995. It started by supplying wiper systems to major outfitting companies specializing in vehicle customization for premium brands. Much of its core business has grown through word-of-mouth, with direct connections to both outfitting companies and OEMs. Its client portfolio has expanded over the years to include prestigious brands such as LAIKA, MOBILVETTA, and ELNAGH, further strengthening its expertise in the motorhome sector.

"A camper's wiper system is comparable to that of a luxury touring bus—it must ensure continuous operation. This is why it is designed using the highest quality materials," explains Adriana Dadda, Sales & Marketing Manager. "In recent years, OEMs and outfitting companies have changed their approach. They choose to retain the original wiper system provided with the vehicle chassis, whether Iveco Daily, Mercedes, or MAN. Although this shift has reduced production volumes, customized wiper systems continue to be integrated into high-end motorhomes."

Beyond wiper systems, Italtergi supplies electric motors for bed-lifting mechanisms and retractable steps, further enhancing comfort and functionality inside campers. In the past, beds were lifted manually using a crank. This challenge led to the development of the ITG90 dual-pin motor, which quickly became a major success in the camper industry.

"Our wiper systems and electric bed-lifting motors ensure exceptional performance and superior reliability. Each product is designed with a strong focus on quality, guaranteeing long-lasting durability and impeccable resistance," concludes Adriana Dadda.

With decades of experience and a constant drive for innovation, Italtergi remains a key reference in the motorhome sector. It offers advanced solutions that enhance safety, comfort, and reliability. The Codogno-based company demonstrates its future-oriented vision and a strong emphasis on
